

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

ANTON DOHRN¹

CONTENTS

<i>Anton Dohrn</i> : PROFESSOR THEODOR BOVERI..	453
<i>The Scientific Work of Miss N. M. Stevens</i> : PROFESSOR T. H. MORGAN.....	468
<i>The School of Journalism of Columbia University</i>	470
<i>British Association Grants for Research</i>	472
<i>Scientific Notes and News</i>	472
<i>University and Educational News</i>	476
<i>Discussion and Correspondence:—</i>	
<i>One Phase of Washington Science</i> : PROFESSOR WM. H. HOBBS. <i>Preparation of Whole Pollen Mother Cells</i> : F. L. PICKETT. <i>Personal Registration of Family Memoranda</i> : DR. MADISON J. TAYLOR. <i>Hermaphrodite Females in <i>Lychnis dioica</i></i> : DR. GEO. H. SHULL	477
<i>Scientific Books:—</i>	
<i>King on The Influence of a Magnetic Field upon the Spark Spectra of Iron and Titanium</i> : PROFESSOR B. E. MOORE. <i>Perkins's Introduction to General Thermodynamics</i> : PROFESSOR A. P. WILLS. <i>Serviss's Astronomy in a Nutshell</i> , <i>McKeady's A Beginner's Star-book</i> : PROFESSOR CHARLES LANE POOR	484
<i>Special Articles:—</i>	
<i>Urophlyctis Alfalfæ</i> : P. J. O'GARA. <i>The "Mammoth" and Spanish Peanuts as grown in Central Iowa</i> : H. WALTON CLARK. <i>Contact Action of Gabbro on Granite</i> : WILLIAM J. MILLER	487
<i>Societies and Academies:—</i>	
<i>The American Mathematical Society</i> : PROFESSOR F. N. COLE	492

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

To speak of Anton Dohrn before zoologists is both easy and difficult. Many, perhaps the greater number, of you have known him personally, some longer and better than I; and all know his work. Of his aims and their attainment he has left us his own graphic recital full of personal charm; and others have paid tribute to his achievements in a manner so incomparable that I can not hope to bring to you anything new. But I have been encouraged in this undertaking by the thought that I do not first need to arouse in you sympathy for his personality. What I have to say will awaken in most of you an answering chord, recalling so many varied reminiscences that my aim will be accomplished, even though my words fail in their expression. So bring back to your mind the image of the beautiful white building with its red loggias, against the dark background of green ilex; picture this building as it stands on the shore of the Bay of Naples. Upon the facade zoologists read with pride the words "Stazione Zoologica," telling each one that here stands a temple of science symbolizing their aims and ambitions. More than two thousand square meters are covered by this building containing more than 150 rooms, in which fifty persons, officials, technicians, artists, fishermen and laboratory servants are continuously engaged in work. At Easter time the visitor to the station will find there as many

¹ Memorial address delivered at the International Zoological Congress, Graz, August 18, 1910, by Dr. Theodor Boveri, professor of zoology and comparative anatomy, Wurzburg. (Translated for SCIENCE.)
